Access, Registration & Sign In

Our products support Internet Explorer 11+, Safari, Chrome, Firefox on Windows, Mac, and mobile devices and tablets.

Register and Sign In links are located on the upper right of the pages. To Register, you will set up a Username and Password, which will work across all of our products. Once you have registered and created an account, Sign In to access your account so you can set, view, and manage your custom alerts and saved articles, topics, and searches.

Usernames are typically your work email address—publicly available email domains such as gmail.com are not permitted for registration. Your same Username and Password will work across all of our products, and when you Sign In to your account, you will be able to pass seamlessly between the product sites. If you don't know your password, click "Forgot your password?" to reset it.

If you have single sign-on access via your company, click on the Sign in link, enter your username, and tab or click to get started.

1 If you are not a subscriber, click **START TRIAL** to take a free 7-day trial. You will be registered as part of the process.

2 **SIGN IN** with your username and password to access and manage your account. If you don't recall or are unsure of your password, there is a "Forgot your password?" link in the sign-in module so you can easily reset it.

From the Sign In screen, you can also **REGISTER** to create an account – so you can receive free email newsletters, set custom email alerts, and save articles, topics, and searches.

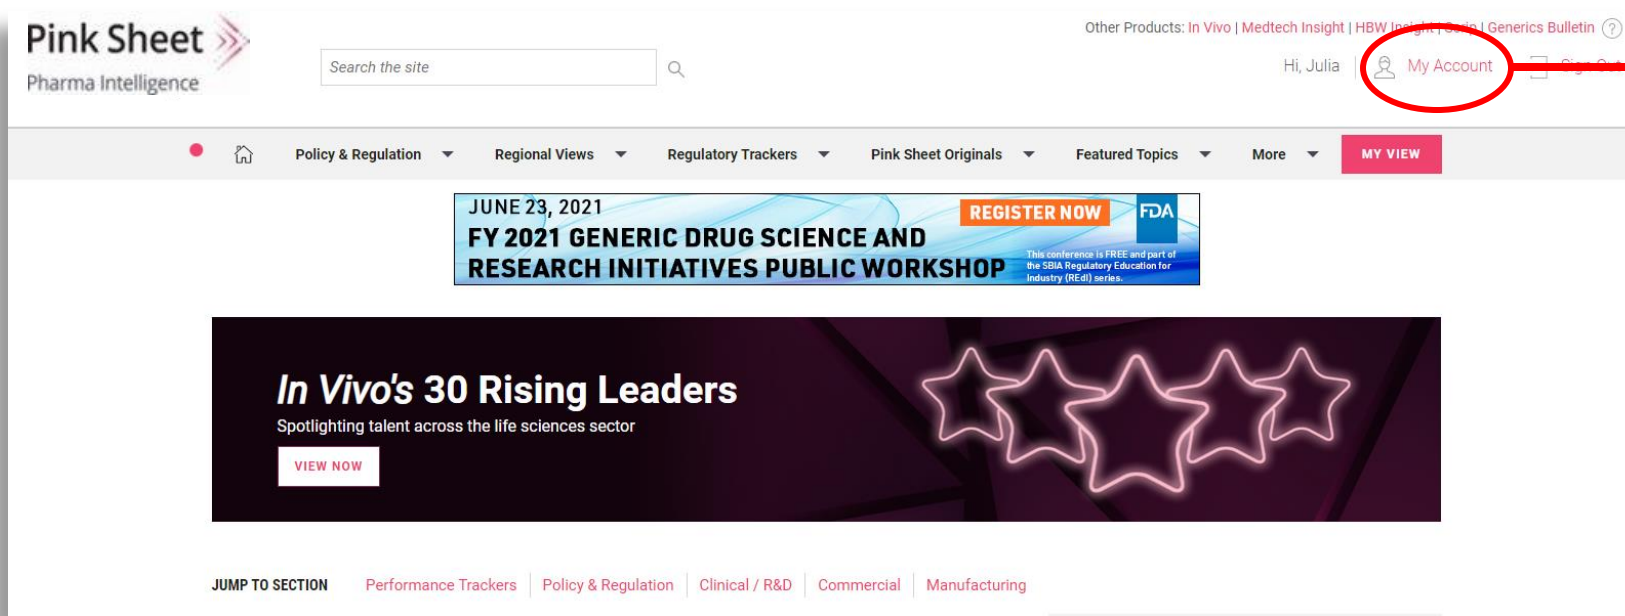

NOTE: You must be a subscriber to read most articles. If your company subscribes, you may receive instant access to articles once you register.

NOTE: If you are registering for a Pharma Intelligence product for the first time, follow the instructions if asked to verify your email address.
